

NadiNet weekly risk brief — Jamuna, Kazipur to Chauhali reach

Issued after the Sentinel-1 pass of **2025-07-25**. Horizon: next 28 days. Risk = calibrated probability that a 200 m bank segment loses at least 40 m of land.

Advisory decision support. The absence of an alert does not mean a bank is safe. Public warnings are issued under an official's authority.

Tiers: **Watch** = in this top-20 list. **Warning** = high risk plus retreat on the latest pass; it reaches households only after an official approves it on the dashboard. Raw risk maps stay with officials and partners; public views are aggregated to union level.

Data: Copernicus Sentinel-1 GRD (ESA), descending track 150, ~05:56 local time; banks traced on 10 m water masks. Reasons describe what the model used, not proven causes. Segments not seen on the latest pass carry no forecast.
